### EDUCATION

Bachelor of Science

Computer Science

University of California

2015 - 2019

San Diego, CA

### SKILLS

Node.js

Express.js

RESTful API

SOAP

MongoDB

Postman

Apache Kafka

Docker

Swagger

JWT

### WORK EXPERIENCE

#### Web Services Developer

Squarespace

2023 - current / Los Angeles, CA

- Developed geospatial indexing dashboards with MongoDB, enhancing location-based offerings for clients in 22 regions
- Monitored event streams with Apache Kafka, ensuring 99.8% message delivery accuracy in 424 service endpoints
- Cataloged reusable Docker container templates, **expediting deployment by 12 hours** per project across 16 teams
- Supervised four developers in the migration of legacy systems to modern APIs with SOAP for 28 enterprise clients

#### Web Designer

PayPal

2021 - 2023 / San Jose, CA

- Harnessed MongoDB for data updates on transaction histories, ensuring a smooth transaction flow for 88K users
- Engineered a Node.js payment system **handling transactions worth \$23K/per hour** with 99.8% uptime
- Organized all web assets using Postman for API testing, expediting customer issue resolution by 3 hours per ticket
- Designed a new user authentication system with JWT, securing transactions for over 14 million users

#### Helpdesk Technician

Microsoft

2019 - 2021 / Redmond, CA

- **Automated 216 password reset requests** per month by leveraging RESTful APIs, reducing manual intervention
- Worked with developers to test API endpoints via Swagger, identifying 16 misconfigurations impacting end-user access
- Created a custom middleware solution using Express.js ensuring 99% accuracy in user authentication processes
- Assisted in building a Node.js tool that analyzed 9GB of logs per day, pinpointing errors and boosting system reliability
